

# CATCH A BUBBLE

## Need:

Bubble Wand

5 Tablespoons of Vinegar

2 Tablespoons of Baking Soda

Scissors

Soft Drink Bottle

Bubble Mixture

## How to:

Make up your bubble mixture and set aside

Cut the top 1/3 off a soda bottle

Add a small bit of vinegar and baking soda into the bottle:

5 Tablespoons of Vinegar

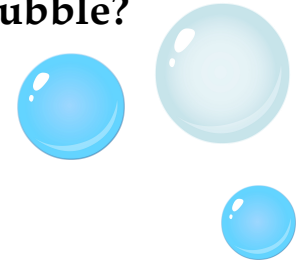

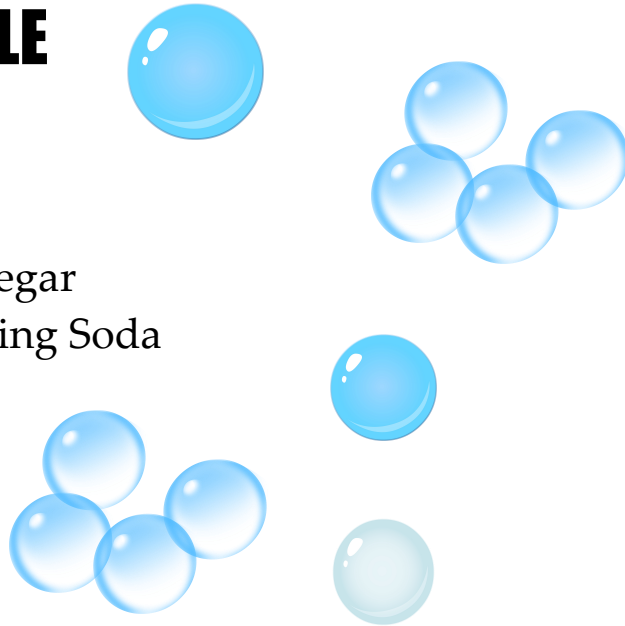

2 Tablespoons of Baking Soda

Blow bubbles with the bubble wand up into the air so they land in the soda bottle with your baking soda and vinegar liquid.

*It is easier for one person to blow the bubbles and another to move the bottle to catch the bubble*

What happens when you catch the bubble?

## GROUP WORKSHEET

When you mix baking soda and vinegar it produces lots of carbon dioxide gas
