A bag of various craft items

Examples - Popsicle sticks, Matchsticks, Ribbon, Foam, Felt, Wool, String, Fabric, Plastic, Paper, Wire, Tape, Cotton, Sticks, Blue-tack, Plastic Knife / Spoon, Paper Towel,

NOTE *Outside activity*

How to:

Your plane just lost both its engines, they fell totally off the wings.

Your plane is over the ocean slowly descending, gliding thanks to the wings still attached.

You grab your life jacket and put it on, you can see land in the distance, I wonder if you'll make it that far or land in the ocean

You turn to the seat next to you, your precious goldfish is travelling with you in a round plastic bag, Oh no! Your goldfish - Mr Gold-tail - does not have a parachute, it just slips off, there is no way to attach it.

You look out the window to see how much time you've got, at this rate you think you have about 9 minutes before you crash land.

You look around the plane, what could you use to make a special parachute for Mr Gold-tail

Time to make your parachute

Once you've made it, it's time to test it.

When you test your parachute, instead of using goldfish that may get hurt, use a plastic fish in a water balloon

Make sure you test it outside
