

Water Cycle

Need:

- Zip-lock Bag
- Sun sticker
- Waves sticker
- Mountain sticker
- Arrows
- Labels
- Water
- Blue Food Dye
- Cotton Ball
- Cello-tape
- Glitter

How to:

1. On the Zip lock bag stick your stickers on the outside in the correct placement for the water cycle.
2. Add the glitter bag into the bottom of the bag
3. Add two drops of blue food dye into the bag
4. Add in an inch of water
5. On the inside of the bag near the top use the tape to stick your cotton wool clouds up.
6. Seal the bag and hang it up in the sun
7. Wait a couple hours

Now look at your bag, see the water cycle?

Press on your clouds - Can you make it rain?

The Water Cycle

Water is evaporated by the sun and rises into the sky
 In the sky it condenses into clouds
 When it rains and the water falls its precipitation
 The glitter represents the salt in the ocean
 Salt is not evaporated with the water
 It stays in the ocean
 The glitter did not evaporate with the water
