

# Create a Creature

**Need:**  
Paper  
Pencils  
Felts

## How to:

You are a zoologist traveling to a new found land; an island that has been unexplored by humans before.

Create and draw a creature that lives on the island and write around your picture of the creature the characteristics and traits of your new species

What type of habitat does the island have, is it a desert, grasslands, forest, arctic?

Where does it live? In a cave, a nest, a burrow?

Does it eat meat - carnivore, vegetation - herbivore or does it eat both making it an omnivore?

Does it have fur, scales, wool?

Does it have hooves, claws, webbed feet?

What's the species name?

Does it lay eggs or give birth to live babies?

*Present your animal to the class*
