

# Giant Bubble Snake Maker

## Need:

Plastic Bottle - Large 2.25 Liter +  
Scissors  
Rubber Band  
Large Sock or Bennie  
Bubble Solution  
Vacuum  
Optional - Food Colouring

**NOTE:**  
**OUTSIDE**  
**ACTIVITY**

## How to:

Cut off the bottom of the bottle - So there is holes at each end of the bottle  
Side Sock / Bennie over the smaller end (top) of the bottle and pull down over the bottle

Pull the sock down so that it covers the bottle

Secure the sock in place with a rubber band

Dip the sock end of your snake maker into the bubble mixture

A few drops of food colouring can be added into the mixture for a great effect

Set vacuum on blow setting instead of suck setting

Place vacuum at the end of the bubble snake maker (open end not sock end)

Turn on the vacuum

When the vacuum blows air through the bottle a bubble snake should start to emerge on the opposite - sock end of the bubble snake maker
